

# Connecting the monitor and turning the monitor on and off

## Connecting the monitor to a power source

## Turning the power on

1. Turn on the main power of the monitor.

- When switching the main power switch on and off, always wait for an interval of at least 5 seconds. Rapid switching may result in malfunction.
2. Press the monitor's POWER button. The power LED will light up orange.
  3. Turn on the computer.

When a signal is input from the computer, the power LED lights up green, and the screen is displayed. (After power is turned on, it may take a little time until the screen is displayed.)

- If the input terminal to which the computer is connected has not been selected, the screen will not be displayed. If necessary, perform input terminal switching. (P7.)

## Notes :

- When using an analog signal, perform an automatic screen adjustment under the following conditions (P10.)
  - Using the monitor for the first time.
  - After having changed the system settings during use.
